

Radon Mitigation Service Providers

What to Look for in a Radon Mitigation Contractor

Minnesota does not require radon mitigation contractors to be licensed, nor is there any oversight of mitigation work performed. Some things you should consider when looking for a contractor to mitigate your home are listed below.

- Will the contractor guarantee that radon levels will be brought to below the Environmental Protection Agency's (EPA) recommended action level of 4.0 picoCuries per liter?
- How will the system be evaluated?
- What will the contractor do if post mitigation radon levels are not below the EPA's recommended action level?
- Can the contractor provide a list of references?
- Is the quoted price guaranteed?
- Is a contract provided?
- Will the contractor offer the homeowner training in radon mitigation system operation/troubleshooting?
- Is there a warranty on materials/workmanship?
- Who is responsible for obtaining permits, if required?
- Who will do the licensed electrical work?

Radon Contractor Certification

Minnesota does not require radon mitigation contractors to obtain certification or licensure. Although it is not required, a voluntary certification does indicate that the individual has received radon mitigation training and has taken continuing radon education. Both the National Environmental Health Association (NEHA) and the National Radon Safety Board (NRSB) have voluntary certification programs for radon mitigation contractors. For more information regarding the requirements of these certifications, information regarding a specific listed contractor, or an updated list of certified professionals, please contact NEHA or NRSB directly.

National Environmental Health Association: (303) 756-9090 or <http://www.neha.org>

National Radon Safety Board: (303) 423-2674 or <http://www.nrsb.org>

Minnesota Radon Mitigation Service Providers

A new requirement to state listing is the voluntary reporting of radon mitigation work to MDH. To be listed under "Category #1," MDH requires quarterly reports be submitted on a timely basis. These reports allow MDH to better determine the amount of risk reduction achieved by tracking the amount of mitigations being performed throughout the state.

The following list includes individuals who provide radon mitigation services within Minnesota, have current contact information, and meet at least one of the following criteria:

- #1. Currently certified as a radon mitigation professional by NEHA or NRSB **and report their work quarterly to MDH.**
- #2. Currently certified as a radon mitigation professional by NEHA or NRSB and do not report their work quarterly to MDH.

Minnesota Radon Mitigation Service Providers

This list does not imply endorsement of any of the listed companies.

| Contractor | Voluntary Certification | Address | Phone | Service Area |
|---|-------------------------|--|--|--|
| The following contractors are certified by either NEHA or NRSB (Criteria #1).* | | | | |
| Walt Fitzmaurice | NEHA | Advanced Radon Services 5428 – 14 th Avenue South Minneapolis, MN 55417 www.radonfree.com | (952) 270-5081 | Statewide |
| Matthew LaBine | NEHA | Aspen Radon Solutions 2022 N. Ferry Street Suite 3301 Anoka, MN 55303 | (763) 434-3687 | 50 mile radius |
| Brian Bachmann | NEHA | Bachmann Heating & Air Conditioning 16919 510th Avenue Lake Crystal, MN 56055 | (507) 546-3086 | 50-75 mile radius |
| Val Riedman | NEHA | Croix Valley Radon Mitigation 2551 190th Street Luck, WI 54853 | (888) 481-6870 | Eastern MN & Western WI |
